Summary

A Junior Data Analyst & BI Developer with a strong foundation in Computer Science. Passionate about providing meaningful business insights and supporting informed decision-making. Proficient in **SQL, Python, Excel, Power BI and BI tools to extract, transform, load and analyze data.** Skilled in creating interactive dashboards and reports that deliver actionable insights to stakeholders.

Education

Bachelor of Computers and information, Computer Science major	MTI University	**Sep 20' | July 23'**

Experience

Data Analyst intern	Agouza Rehabilitation&Rheumatology Center(ARRC)	**Dec 24' | Jan 25'**

Technologies: (Python,Excel,Power BI)

- Patient Satisfaction Survey **Analysis** of Outpatient Services.
  I created a project to analysis patient satisfaction survey of outpatient services with **python**.
  The program read paper from **scanner** then transform it into values then I made analysis on every question in paper than Display **Yes** and **No** Percentages. Help **providing meaningful insights** about patients satisfaction.

Projects

Preview Portfolio

E-commerce Database Management System Using SQL Server, SSIS, SSAS & SSRS

- Created a (**DBMS**) project, including an Entity-Relationship Diagram (**ERD**) and Mapping.
- Used **SQL** for implementing **OLTP**, and **Datawarehouse OLAP** components.
- Managed challenges related to **data integration**, scalability, and complex data transformations.
- Used (**SSIS**) for seamless data extraction, transformation, and loading processes.
- Used (**SSAS**) to make **cubes** and (**SSRS**) to provide intuitive **insights** and **reports** for end-users.

Restaurant Sales Analysis Project Using Microsoft Power BI

- Designed business overview and Restaurant performance **dashboards** in **Power BI**.
- help in enhance **sales strategies** and make **data-driven decisions**.

Customer Churn Analysis Project Using Microsoft Power BI

- Designed business overview and Restaurant performance **dashboards** in **Power BI**.
- Presented compelling **insights** that drive informed decision-making.
- Following customer behavior to know the rate at which customers leave a business compared to the total number of active customers and using techniques to attract customer once agent.

Human Resources Analysis Project Using Microsoft Power BI

- Demonstrated expertise in data importing and **modeling** within **Power BI**.
- The report provides an analysis of employee turnover in a company, detailing the turnover rates by year, reasons for termination, average salary, and demographic breakdowns such as gender, education level, and location.
- It also highlights key metrics like the overall turnover rate of 29.17% and an average salary of $4.11K.

Carrefour Web Scraping With Python - WebScraping Using Python

- Created a **WebScraping** script using **Python**, **Requests**, and **BeautifulSoup** to collect the data.
- **Extracted data** including product names, regular and sale prices, sale percentages, sizes, and colors.
- Implemented pagination handling to **scrape** data from **multiple pages** and ensured data consistency.
- Generated a **CSV file** to store the collected data for potential **business analysis**.

Weather Data Analysis Project using Python Pandas

- derive meaningful insights and patterns from the dataset
- and use various **pandas functions** and methods to manipulate and **analyze the data**.

Coffee Machine OOP Project using Python OOP

- Used **OOP** With **Python** to make Coffee Machine Project, Using **Classes** and **Objects**.

Technical Skills

- **Technologies:** (SQL Server, Visual Studio, Power BI, Excel, PyCharm, Subline and Project Jupyter)
- **Structure Query Languages: SQL Server** (SQL statements, Join, Grouping, Aggregate Functions, Union, Subqueries, Ranking Functions, Constraints, Rules, Variables, IF, While, Functions, View, Stored Procedure, Index, Trigger, Cursor, Jobs, Snapshot, Backup & Restore)
- **Database Design:** (Normalization, ERD, EERD, Mapping, Creation & Implementation, OLTP)
- **Familiar with Datawarehouse:** (ETL, Data Mart, OLAP, Star Schema, Snowflake Schema, Fact & Dim)
- **Python Programming Language:** Python (Pandas, NumPy, Matplotlib, Tkinter, OpenCV)
- **Web Scraping:** With Python (BeautifulSoup, Requests, Selenium WebDriver)
- **Data Visualizations tools:** Power BI (Data Sources, Power Query, Data Modeling, DAX, Reports and Dashboards)
- **BI tools: SSIS** (ETL, ELT, Star Schema, DWH, Data Marts),

  SSAS (Cubes, KPI's, Hierarchies, Calculations, OLAP) &

  SSRS (Reports)
- **Microsoft Excel:** (Pivot Tables, Advanced Functions, Nested Functions and Dashboards)
- **Version Control System:** Git & GitHub
- **Familiar with:** (C++ Programming Language, HTML & CSS, SQLAlchemy & SQLite)
- **Soft Skills:** (Continuous Learning, Leadership, Teamwork, Hardworking & Time Management)

Certificates

- [Data Literacy Essentials](#) S.sas
- [Artificial Intelligence (60 hrs.)](#)
- [100 Days of Code: The Complete Python Pro Bootcamp for 2023](#)
- [Database and SQL Fundamentals](#)
